PROFESSIONAL SUMMARY

Backend Developer specializing in **Node.js, NestJS, and TypeScript**, with hands-on experience building secure, scalable REST APIs for E-Commerce, Fintech, and SaaS-style applications. Focused on clean architecture, authentication and authorization, API documentation, caching, and maintainable backend systems.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, C++
Backend:	Node.js, NestJS, Express.js, RESTful APIs
Databases & Caching:	MongoDB, Mongoose, Redis
Auth & Security:	JWT, RBAC, OTP/Email Verification, Password Hashing
Cloud & Services:	AWS S3, Email Services
API & Testing:	Swagger/OpenAPI, Postman, DTO Validation, Exception Handling, Unit Testing
DevOps & Tools:	Docker, Git, GitHub, npm
Architecture:	OOP, Dependency Injection, Repository Pattern, Async/Await, Caching

SELECTED PROJECTS

Talabat — E-Commerce Backend | github.com/mostafagaber49/talabat

Stack: NestJS, TypeScript, MongoDB, Mongoose, Redis, JWT, AWS S3, Email Services, Docker

- Built a complete e-commerce REST API covering users, products, orders, and core shopping workflows.
- Implemented registration, login, password recovery, JWT authentication, and role-based access control.
- Added Redis caching, AWS S3 file uploads, email workflows, and order/payment workflow handling.
- Applied modular NestJS architecture, DTO validation, Swagger/OpenAPI documentation, Postman testing, and centralized exception handling.

Banking Wallet API | github.com/mostafagaber49/banking-wallet-api

Stack: NestJS, TypeScript, MongoDB, Redis, JWT, Docker, Swagger

- Developed a digital wallet API supporting accounts, wallets, deposits, withdrawals, and wallet-to-wallet transfers.
- Implemented JWT authentication, OTP account verification, password hashing, and protected routes.
- Modeled users, wallets, and transactions in MongoDB, used Redis for caching, and documented the API with Swagger.
- Added global ValidationPipe, exception handling, Docker configuration, and unit tests.

Movie App API | github.com/mostafagaber49/Movie-app

Stack: NestJS, TypeScript, MongoDB, Mongoose, JWT, Vitest

- Built a movie backend with authentication, movies, favorites, and reviews modules.
- Structured the code with services and repositories, and wrote unit tests with Vitest.

Weather App API | github.com/mostafagaber49/weather-app

Stack: NestJS, TypeScript

- Built a weather backend API serving current conditions, hourly forecast, and 7-day forecast by city search.
- Applied modular NestJS architecture with DTO validation and centralized exception handling.

Saraha App — Anonymous Messaging API | github.com/mostafagaber49/Saraha-app-Anonymous-Messaging-API

Stack: NestJS, TypeScript, MongoDB, Mongoose, JWT

- Built an anonymous messaging backend with user accounts and message functionality.
- Implemented authentication, protected routes, DTO validation, repositories, and MongoDB schemas.

EDUCATION

Mansoura University — Faculty of Law | Bachelor of Law
Self-taught developer focused on modern backend technologies and the JavaScript ecosystem.
