PROFILE

Back-End Developer specializing in Node.js, NestJS, Express.js, and TypeScript. Experienced in building RESTful APIs and backend systems using MongoDB, Redis, JWT, AWS S3, Email Services, Docker, Swagger/OpenAPI, and Postman. Focused on clean, scalable, and maintainable backend applications.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, C++
- **Backend:** Node.js, Express.js, NestJS, RESTful APIs
- **Database:** MongoDB, Mongoose, Redis
- **Authentication:** JWT, Authentication & Authorization, Password Hashing, OTP/Email Verification
- **Cloud & Services:** AWS S3, Email Services
- **API & Documentation:** Swagger/OpenAPI, Postman
- **DevOps & Testing:** Docker, Unit Testing
- **Architecture & Concepts:** OOP, Async/Await, Promises, Caching, DTO Validation, Dependency Injection, Repository Pattern, Exception Handling
- **Tools:** Git, GitHub, VS Code, npm

PROJECTS

Talabat – E-Commerce Backend

Stack: NestJS, TypeScript, MongoDB, Redis, JWT, AWS S3, Email Services

- Built a complete E-Commerce REST API covering users, products, orders, and core shopping workflows.
- Implemented authentication and authorization including Register, Login, Forgot/Reset Password, JWT, and role-based access control.
- Implemented Redis caching, Email Services, AWS S3 file uploads, and payment-related backend functionality.
- Used DTO validation, modular NestJS architecture, MongoDB/Mongoose, Swagger/OpenAPI, Postman, Docker, and exception handling.

Banking Wallet API

Stack: NestJS, TypeScript, MongoDB, Redis, JWT, Docker, Swagger

- Built a digital wallet API supporting accounts, wallets, deposits, withdrawals, and wallet-to-wallet transfers.
- Implemented JWT authentication, account verification/OTP, password hashing, validation, protected routes, and role handling.
- Used MongoDB for users, wallets, and transactions and Redis for caching.
- Added Swagger documentation, global ValidationPipe, exception handling, Docker configuration, and API testing.

Job Board API

Stack: NestJS, TypeScript, MongoDB, Mongoose, JWT, Swagger

- Built a job board backend covering users, companies, jobs, applications, and saved jobs.
- Designed MongoDB schemas and repository layers using modular NestJS architecture.
- Implemented authentication, validation, protected REST endpoints, and API workflows.
- Used Swagger/OpenAPI, Postman, Docker, and structured service/controller/repository layers.

Saraha App – Anonymous Messaging API

Stack: NestJS, TypeScript, MongoDB, Mongoose, JWT

- Built an anonymous messaging backend with user accounts and message functionality.
- Implemented authentication, protected routes, DTO validation, repositories, and MongoDB schemas.
- Structured the application with NestJS modules, controllers, services, repositories, and schemas.

EDUCATION

Mansoura University – Faculty of Law

Bachelor of Law
